⁴ **Fraunhofer Fokus**, Germany

Outline

- The concept
 - ⇒ a serious game to support green and collaborative mobility

- Fun and personal improvement
 - ⇒ Virtual bank, competitions and social networking

- Potential business analysis
 - ⇒ Value proposition
 - ⇒ Potential customers
 - ⇒ Financing
 - ⇒ Value chain

Context

- Serious games (SGs) are gaining attention in the **infomobility and transportation area**
 - ⇒ Practice in the context is promising to improve drive style
 - ⇒ Driver in the field can exploit his experience

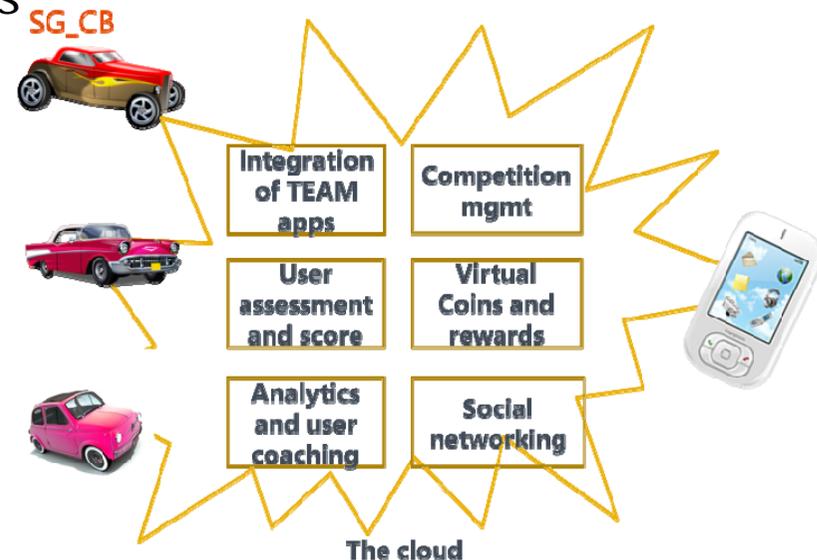

- **TEAM EU FP7 project**
 - ⇒ Develop a cloud-based system of apps for smart and collaborative mobility
 - ✔ Sample apps: eco friendly parking, collaborative public transport optimization, collaborative navigation, collaborative planning, etc.
 - ✔ Among them, a serious game for collaborative green mobility

SG for collaborative green mobility

- A tool for personal improvement through self and social competition
 - ⇒ Combination of different **user performance evaluators**
 - ▼ Based on the other TEAM apps
 - ⇒ User is motivated to improve performance
 - ⇒ Support to a community of users
 - ▼ Share events, results and related info
- Service-Oriented architecture
 - ⇒ Evaluators
 - ⇒ Services

Evaluators

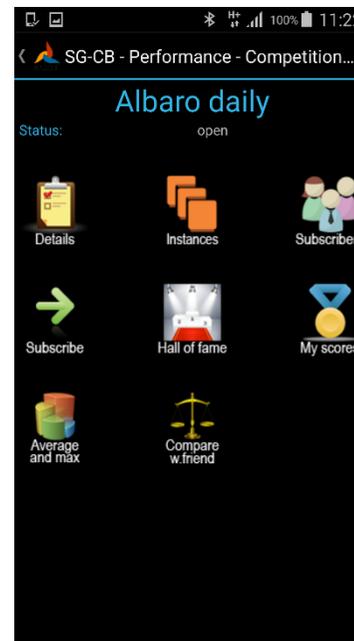

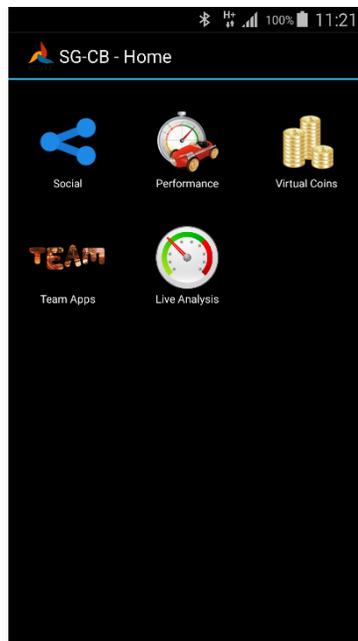

- “Virtual sensors” for user evaluation
 - ⇒ Criteria related to green and collaborative driving/mobility
- ⇒ Currently implemented evaluators are based on TEAM apps
 - ⇒ Eco-Friendly parking
 - ⇒ Collaborative automotive navigation
 - ⇒ Co-modal travel planning/coaching
 - ⇒ Green Drive
 - ⇒ Collaborative Public Transport Optimization

Screenshots

- System functionalities illustrated through snapshots of the SG_CB smartphone client app

Virtual Bank game service

- Management of “virtual coins”
 - ⇒ Gained by behaving well according to the evaluators
 - ⇒ Usable to acquire real-world items
 - ▼ Bus tickets, parking slots, etc.
 - ⇒ And virtual items
 - ▼ Access premium levels in the TEAM apps
- Gamification effects
 - ⇒ Saturation
 - ⇒ “happy hours”
 - ⇒ “happy areas”

| Date | Time | App | Amount |
|------------|----------|-------|--------|
| 21/10/2015 | 14:28:41 | SG-CB | -80 |
| 20/05/2015 | 09:12:45 | EFP | 99 |
| 17/03/2015 | 12:46:10 | SG-CB | 256312 |
| 17/06/2014 | 08:55:18 | C-ACC | 10 |

Competition game service

➤ Competitions

⇒ Organized in geographic areas and/or time periods

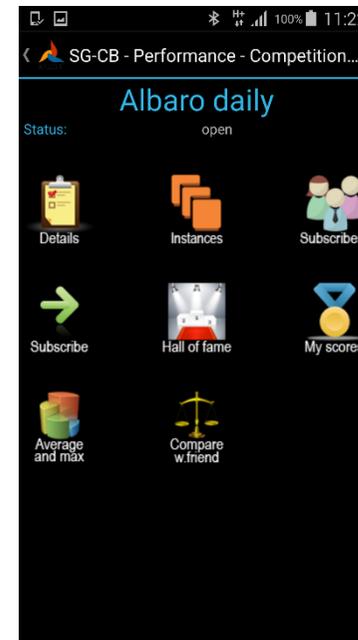

⇒ Users

 ✔ Subscribe

 ✔ Watch rankings in real-time

 ✔ Comparison with self and friends

⇒ Best performers rewarded with virtual coins and notified through the social network

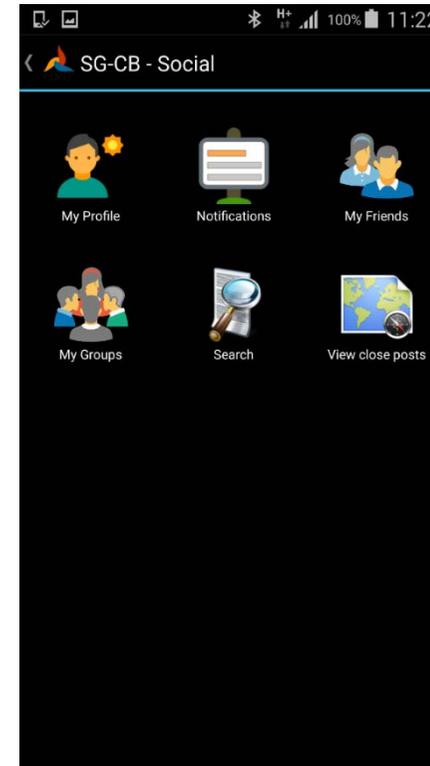

| Rank | Player | Score | Date |
|------|--------------|-------|------------------------------|
| 1 | Massimiliano | 85 | Thu Oct 22 14:50:46 UTC 2015 |
| 2 | Massimiliano | 68 | Thu Oct 22 15:55:53 UTC 2015 |
| 3 | Massimiliano | 63 | Fri Oct 23 05:12:21 UTC 2015 |
| 4 | Massimiliano | 60 | Wed Oct 21 12:58:06 UTC 2015 |
| 5 | marcosam | 49 | Mon Oct 26 13:51:15 UTC 2015 |
| 6 | marcosam | 42 | Tue Oct 27 15:56:25 UTC 2015 |
| 7 | marcosam | 33 | Tue Oct 27 09:58:19 UTC 2015 |
| 8 | marcosam | 13 | Mon Oct 26 14:03:41 UTC 2015 |

Basic social networking service

- Friends
- Groups
- Posting
 - ⇒ on walls
 - ⇒ on maps
- Notifications
 - ⇒ E.g., about competition results

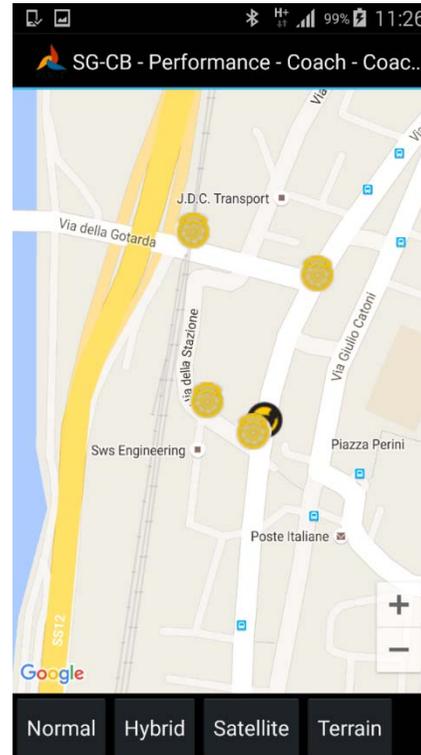

Performance events and summary

SG-CB - Performance - Competition...

| Date | Event | Indicator |
|---------------------|--------------------------|-----------|
| Tue Oct 27 16:21:42 | Brake High Speed High | Yellow |
| Tue Oct 27 16:21:42 | Brake High Speed High | Yellow |
| Tue Oct 27 16:21:43 | Acceletion | Yellow |
| Tue Oct 27 16:21:43 | Rpm | Yellow |
| Tue Oct 27 16:21:43 | Brake High Speed High | Yellow |
| Tue Oct 27 16:21:43 | Brake High Speed High | Yellow |

SG-CB - Performance - Coach Sum...

Albaro MS Test2

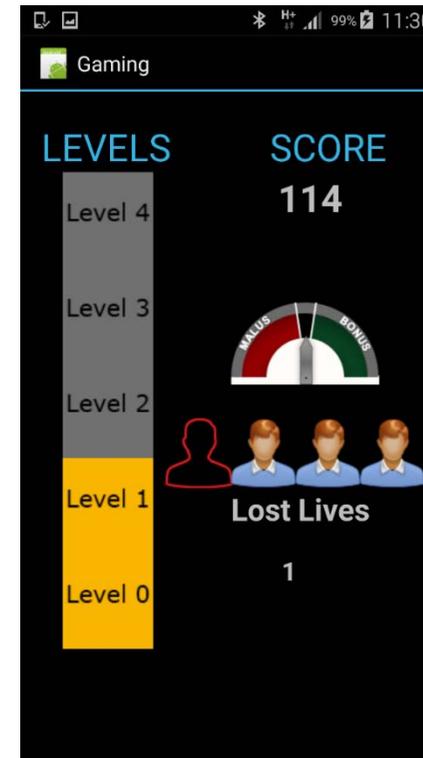

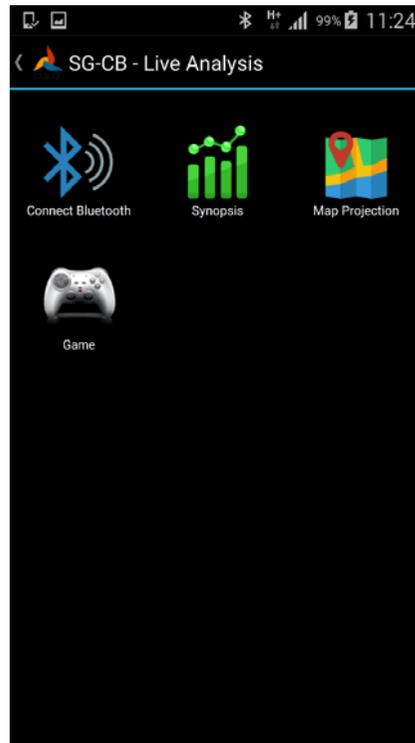

Performance item

| | |
|-------------------------|--------|
| Brake Speed Steering | Red |
| Brake Speed | Red |
| Brake Steering | Red |
| Brake | Yellow |
| Acceletion Steering | Green |
| Rpm | Green |

Real-time performance

Business Analysis: Value Proposition

➤ Value for **drivers**:

- ⇒ The system promotes green and collaborative driving
- ⇒ The apps provide new mobility services
- ⇒ The SG closes a “virtuous cycle”
 - ▼ Engages, challenges and motivates users towards improving the use of apps

➤ Value for **stakeholders**:

- ⇒ Cities can benefit from virtuous user behaviors
 - ▼ Traffic, navigation, parking
 - ▼ Optimized use of resources
- ⇒ Manufacturers can be in contact with a community of users
 - ▼ New ways to advertise products
 - ▼ A sign of eco-friendliness

Business Analysis: Potential Customers

➤ End-users

- ⇒ Better driving experience
- ⇒ Improve green and collaborative drive style, in the long run

➤ Stakeholders

- ⇒ Local authorities
- ⇒ OEMs
- ⇒ Infrastructure operators

➤ Third parties

- ⇒ App and evaluator developers (new mobility services)
- ⇒ Social networking
- ⇒ Availability of a mass of new, geo-referenced data about green and collaborative driving
 - ▼ Privacy issues

Business Analysis: Financing

- At least at the beginning, subscription should be **free**
 - ⇒ Quick growth of the community is key to the success
 - ⇒ **Freemium** access could be considered

- **Advertising**
 - ⇒ Also based on location and other user profile data

- **Investors**
 - ⇒ “smart cities” interested in eco-friendly behavior
 - ⇒ OEM corporate communities

- The game incentivizes the use of the other apps and evaluators
 - ⇒ **joint venture** with apps
 - ⇒ Selling usage data

Business Analysis: Value Chain

Virtual sensors

Mobility support apps and evaluators

Cloud platform

Social gaming services

Data

Geo-localized, individual and combined

Providers

Social network, navigation suppliers

End-users

Discounts, pay-back

Stakeholders

Mobility suppliers, corporate comm.s, cities, insurances, companies for ads

Conclusions

- An ecosystem for connected, collaborative and green mobility
- The SG as a tool to incentivize and improve the use
 - ⇒ Personal improvement through behavior analysis, competition and socialization
- Related business
 - ⇒ Value for drivers
 - ▼ Better performance, use of resources, rewards
 - ⇒ Value for stakeholders
 - ▼ Virtuous user behaviors, contact with a community
 - ⇒ Advertising
 - ▼ Promotion of new mobility services
 - ⇒ Freemium approach
- Concept and infrastructure may be used in different domains, also for other SGs
